Your positive step for living
well at home in later life

Why choose

StayClose

A flexible and affordable way to live well at home for longer

- **Peace of mind:** Families can stay connected and check in on loved ones remotely without being intrusive.
- **Staying independent at home:** Loved ones can remain in their homes longer with support systems in place.
- **Medication reminders:** Helps ensure medications are taken correctly and on time.
- **Routine tracking:** Identifies changes in daily habits that may indicate a decline in health.
- **Cost savings:** A smart way to keep care affordable by delaying or avoiding the need for assisted living or frequent in-person checks.
- **Living life to the fullest:** Loved ones maintain their independence while staying safer and more connected.

Helping you take charge of your health and wellbeing in later life

Perfectly suited to those living alone

Prevention is better than a fall

30% of people aged over **65*** and **50%** over **80*** will experience a fall every year, but it may have been possible to prevent it if they'd known the signs to look for.

Feel free
to enjoy
life

Effective not intrusive

StayClose empowers you to take charge of your health and happiness as you get older.

We've combined decades of care experience with smart technology to give you a clear picture of your health. With these insights at your fingertips, you can have more meaningful discussions with your GP and make informed choices about your wellbeing.

With a CQC-rated care partner by your side, you'll have expert advice and in-person support ready whenever you need it. This seamless combination of digital monitoring and human touch ensures you are never navigating the complexities of ageing alone. Ultimately, StayClose gives you the confidence to stay independent and keep enjoying life in your own home.

StayClose

Bringing Families Together

StayClose allows you to send photos and messages, and make video calls all on the TV. It's the simplest way to keep family life close, even when you live miles apart.

Works with any TV just plug in and go

Starting at
£85
(per month)

Technology should adapt to people, not the other way round. StayClose bypasses apps, logins, or passwords to deliver messages, calls and reminders directly to the TV screen using a simple remote.

Everything happens on the familiar TV screen. Calls appear automatically, and reminders or messages show up clearly with sound and light alerts. This gives users immediate confidence and total control from the moment it's installed.

Leading the discussion with loved ones...

- ♥ "It will give me peace of mind when I can't be there"
- ♥ "You won't even notice it's there"
- ♥ "We can speak more often than we do now"
- ♥ "We would be close by even when we are away"

Medication Administration made easy

Reliable medication management is the cornerstone of staying independent and healthy at home. You deserve a system that removes the guesswork and ensures total accuracy. Our Virtual Medication Administration delivers professional oversight through your TV, giving you the expert backup you need to manage your health with confidence.

99%
medication
adherence

Starting at
£320
(per month)

Connect: Schedule a virtual session through your screen with one of our qualified healthcare professionals.

Guide: Our professional will provide step-by-step guidance via a secure video connection.

Support: Receive real-time support, answers to your questions, and visual confirmation that your medication is being taken correctly.

Care: Gain the confidence that comes from having professional clinical backing for your daily routines.

Leading the discussion
with loved ones...

- ♥ "It will give me peace of mind when I can't be there"
- ♥ "You won't even notice it's there"
- ♥ "We don't have to worry about re-ordering your medication"
- ♥ "It will keep you more independent at home"

Next Steps:

Getting Started with Technology-Enabled Care

Getting started with technology-enabled care is simple and designed around your needs.

- **Identify Your Needs**
Think about the type of support that would be most helpful, whether it's managing a health condition, staying safe at home, or supporting a caregiver.
- **Explore Care Options**
Technology-enabled care may include remote monitoring, virtual visits, medication support, or care coordination. Services can be tailored to fit your goals.
- **Review Eligibility and Coverage**
Our team will help confirm eligibility, review coverage, and explain any costs so you know what to expect.
- **Meet Your Care Team**
A care professional will work with you to create a personalised care plan and answer any questions.
- **Set Up and Get Started**
We will handle the setup, provide training, and offer ongoing support to ensure services work smoothly and adapt as your needs change.

A positive step
for independent
living in later life
